Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance of claims 1-16.

For independent claim 1 the prior art of record does not disclose or clearly suggest a system for detecting position or dimensions of an object comprising: a receiver unit, adapted for wirelessly receiving signals, the receiver unit comprising:

the generation and control section comprising threshold generation circuits and automatic checking circuits for checking difference in amplitude between the input signals and the reference signals, wherein said automatic checking circuits comprise discriminating circuits adapted for detecting at least one attribute of the input signals and for varying said difference in amplitude if said at least one detected attribute corresponds to the wirelessly received signals that differ from said pulse signals transmitted by the remote transmission unit

in combination with the remaining limitations of the claim.

Claims 2-8 recite limitations which, in combination with allowed claim 1, render the dependent claims allowable.

For independent claim 9 the prior art of record does not disclose or clearly suggest a method for checking the dimensions or the position of an object, the method comprising:

identifying noise signals on the basis of attributes differing from those of the signals transmitted by the remote transmission unit, and varying in a dynamic way difference in amplitude between the reference signals and the input signals.

in combination with the remaining limitations of the claim.

Claims 10-16 recite limitations which, in combination with allowed claim 9, render the dependent claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record is considered pertinent to applicant's disclosure. The prior art cited in PTO-892 disclose related systems and methods.
